The Bulletins of this Station are mailed free to citizens of Connecticut who apply for them, and to others as far as the editions permit.

CONNECTICUT AGRICULTURAL EXPERIMENT STATION.

OFFICERS AND STAFF.

BOARD OF CONTROL.

His Excellency, Marcus H. Holcomb, *ex-officio*, *President*.

James H. Webb, *Vice President*.....Hamden
George A. Hopson, *Secretary*.....Wallingford
E. H. Jenkins, *Director and Treasurer*.....New Haven
Joseph W. Alsop.....Avon
Wilson H. Lee.....Orange
Elijah Rogers.....Southington

Administration. E. H. JENKINS, PH.D., *Director and Treasurer*.
MISS V. E. COLE, *Librarian and Stenographer*.
MISS L. M. BRAUTLECHT, *Bookkeeper and Stenographer*.
WILLIAM VEITCH, *In charge of Buildings and Grounds*.

Chemistry.

Analytical Laboratory. *JOHN PHILLIPS STREET, M.S., *Chemist in charge*.
E. MONROE BAILEY, PH.D.,
C. B. MORISON, B.S., C. E. SHEPARD, } *Assistants*.
M. D'ESOP, PH.B.
HUGO LANGE, *Laboratory Helper*.
V. L. CHURCHILL, *Sampling Agent*.

Protein Research. T. B. OSBORNE, PH.D., D.Sc., *Chemist in Charge*.
MISS E. L. FERRY, M.S., *Assistant*.

Botany. G. P. CLINTON, Sc.D., *Botanist*.
E. M. STODDARD, B.S., *Assistant Botanist*.
MISS F. A. MCCORMICK, PH.D., *Scientific Assistant*.
G. E. GRAHAM, *General Assistant*.

Entomology. W. E. BRITTON, PH.D., *Entomologist; State Entomologist*.
B. H. WALDEN, B.Agr., *First Assistant*.
Q. S. LOWRY, B.Sc., I. W. DAVIS, B.Sc., } *Assistants*.
M. P. ZAPPE, B.S.,
MISS G. A. FOOTE, B.A., *Stenographer*.

Forestry. WALTER O. PILLEY, *Forester; also State Forester*
and State Forest Fire Warden.
A. E. MOSS, M.F., *Assistant State and Station Forester*.
MISS E. L. AVERY, *Stenographer*.

Vegetable Growing. W. C. PELTON, B.S.

* Absent on leave, In U. S. Service.

Report on Commercial Fertilizers, 1917.

By E. H. JENKINS, *Director*, and JOHN PHILLIPS STREET,
Chemist in Charge of the Analytical Laboratory.

During 1917 forty-four individuals and firms have entered for sale in this state 410 brands of fertilizers classified as follows:

Nitrogenous superphosphates with potash.....	167
Nitrogenous superphosphates without potash.....	160
Bone manures and tankage.....	34
Fish, blood, castor pomace and chemicals.....	49
Total.....	410

During the spring months V. L. Churchill, the sampling agent of the Station, visited about 100 towns and villages of the state and gathered samples of commercial fertilizers. These represented all the brands registered with the exception of the following:

Alpha Portland Cement Co.'s Alpha Potash-Lime Fertilizer; *American Agricultural Chemical Co.'s* Dissolved Acid Phosphate, H. G. Acid Phosphate, Grain and Seeding Fertilizer, Odorless Grass and Lawn Top Dressing Revised, Monarch Potato Manure, Great Harvest Potato Special, Lion Brand Potato Manure, Bradley's Eclipse Phosphate 1916, Bradley's Extra Potato and Root Special, Bradley's Northland Potato Grower, Bradley's Complete Manure for Top Dressing Grass and Grain, Bradley's Triplex Potato Special, East India Economizer Phosphate 1916, East India Pilgrim Fertilizer 1916, East India Mayflower 1916, Quinnipiac Corn Manure 1916, Quinnipiac Phosphate 1916, Williams and Clark's Royal Phosphate 1916, Williams and Clark's Matchless Fertilizer 1916; *Apothecaries Hall Co.'s* Victor Corn Phosphate; *Bowker's* Superphosphate with Ammonia 1%, Stockbridge Complete, Potato Phosphate 1916, Complete Alkaline Tobacco Grower 1916; *Clark's* Special Mixture; *Coe Mortimer's* Extra Special Potato Fertilizer Revised, 12% Blood Tankage; *James' Ground Bone*; *Lister's* Buyer's Choice Acid Phosphate, Valley

Brand Fertilizer 1916, Celebrated Tobacco Fertilizer; *Manchester's* 14% Acid Phosphate, Fine Ground Bone, Ground Tankage 9-20; *National* Ammoniated Phosphate 1916, Excelsior Potato Fertilizer, H. G. Top Dressing 1916.

A sample of the American Agricultural Chemical Co.'s Grain and Seeding Fertilizer, sent by a purchaser, was analyzed.

CLASSIFICATION OF FERTILIZERS ANALYZED.

1. *Containing nitrogen as the chief active ingredient:*

Nitrate of soda.....	9
Cotton seed meal.....	95
Castor pomace.....	8

2. *Containing phosphoric acid as the chief active ingredient:*

Basic lime phosphate.....	4
Precipitated bone phosphate.....	6
Precipitated phosphate.....	1
Acid phosphate.....	17
Phospho plaster.....	1
Barium phosphate.....	1

3. *Containing potash as the chief active ingredient:*

Muriate of potash.....	3
Cotton hull ashes.....	1

4. *Containing nitrogen and phosphoric acid:*

Fish manures.....	12
Tankage.....	13
Bone manures.....	21

5. *Mixed fertilizers:*

Nitrogenous superphosphates with potash.....	147
Nitrogenous superphosphates without potash.....	198

6. *Miscellaneous fertilizers and waste products:*

Sheep manure.....	6
Wood ashes.....	20
Household wastes.....	28
Limestone.....	5
Miscellaneous.....	29

Total..... 625

I. RAW MATERIALS CHIEFLY VALUABLE FOR NITROGEN.

NITRATE OF SODA, OR SODIUM NITRATE.

As offered in the Connecticut market this year, nitrate of soda has contained an average of 15.44 per cent. of nitrogen, equivalent to 93.6 per cent. of pure sodium nitrate.

The following nine samples were analyzed:

9364. Sold by Apothecaries Hall Co., Waterbury. Sampled at factory.

8944. Sold by Sanderson Fertilizer & Chemical Co., New Haven. Stock of C. R. Treat, Orange.

8947. Sold by Wilcox Fertilizer Co., Mystic. Sampled at factory.

9333. Sold by Coe-Mortimer Co., New York City. Stock of J. E. Stoddard, Abington.

9331. Sold by Berkshire Fertilizer Co., Bridgeport. Stock of C. Buckingham, Southport.

8939. Sold by American Agricultural Chemical Co., New York City. Stock of G. S. Phelps & Co., Thompsonville.

9352. Sold by L. T. Frisbie Co., New Haven. Sampled at factory.

8942. Sold by Nitrate Agencies Co., New York City. Stock of E. B. Palmer, Bridgeport.

9361. Sold by F. S. Royster Guano Co., Baltimore, Md. Stock of A. W. Anderson, Northford.

ANALYSES OF NITRATE OF SODA.

Station No.	9364	8944	8947	9333	9331	8939	9352	8942	9361
<i>Per cent. of</i>									
Nitrogen guaranteed.	15.00	15.00	15.00	15.00	14.80	15.00	15.00	15.00	15.00
Nitrogen found.	15.52	15.20	15.48	15.44	15.32	15.34	15.34	15.56	15.78
Cost per ton.	\$70.00	70.00	73.00	73.00	85.00	88.00	90.00	90.00
Nitrogen costs cents									
per pound.	22.6	23.0	23.6	23.6	27.7	28.7	29.3	28.5

The cost of nitrogen in nitrate of soda in small lots at retail has been on the average 26 cents per pound, 1 1-2 cents more than last year, and 9 or 10 cents more than in 1915.

The supply has been so small, however, and the rise in price as the season advanced has been so rapid that average figures have little significance.

COTTON SEED MEAL.

Ninety-five samples of this material, bought for use as a fertilizer, have been tested. Most of the samples represent car lots.

Of the 69 samples which came to the laboratory with guaranties, 26 contained the claimed amount of nitrogen and require no detailed report here. On the other hand, 43, or 62 per cent. of the guaranteed samples, were deficient in nitrogen. The analyses of these samples are given in the table.

The deficiencies were not quite so great in amount as last year ranging from 0.10 to 0.81 per cent., with an average in the 43 samples of 0.30 per cent. Based on the average cost of nitrogen in cotton seed meal, as determined below, these deficiencies would warrant a rebate of from 53 cents to \$4.29 per ton, a considerable item when the meal is purchased in car lots.

The ninety-five samples contained from 5.37 to 7.20 per cent. of nitrogen, with an average of 6.10 per cent. The average cost per ton, in the 79 samples where the price was furnished, was \$44.20, about \$5.50 higher than last year.

Assuming 2.9 and 1.9 as the respective percentages of phosphoric acid and potash in the meal, if they are valued at 4 cents and 25 cents per pound, respectively, the nitrogen of cotton seed meal in the ninety-five samples cost on the average 26.5 cents per pound, 5.6 cents higher than last year. This is equivalent to \$5.30 per unit.

Most of the purchasers report that where the nitrogen in the meal was less than guaranteed they had little difficulty in securing rebates.

In our judgment the rebates did not fully compensate for the deficiency where not more than \$4.00 per unit was allowed. Certainly, at present prices of meal, \$5.30 per unit is none too high a rebate.

CASTOR POMACE.

This is a residue from the manufacture of castor oil and is used chiefly as a tobacco fertilizer. Experience indicates that it is a little slower in its action than cotton seed meal and that it gives a somewhat heavier quality to the tobacco leaf. Stock will eat it greedily if they have the chance, but it is extremely poisonous.

The following eight samples were analyzed:

8940. Sold by American Agricultural Chemical Co., New York City. Stock of C. F. Allen, Warehouse Point.

8871. Sold by Apothecaries Hall Co., Waterbury. Sampled and sent by Karl C. Kulle, Suffield.

9330. Sold by Apothecaries Hall Co., Waterbury. Stock of W. J. Reeves, Windsorville.

9350. Sold by Baker Castor Oil Co., New York City. Stock of Olds & Whipple, Hartford.

9332. Sold by Berkshire Fertilizer Co., Bridgeport. Stock of W. N. Pinney, Rockville.

9390. Sold by Coe-Mortimer Co., New York City. Stock of M. C. Griffin, East Granby.

9360. Sold by Olds & Whipple, Hartford. Stock of J. N. Lasbury, Broad Brook.

8945. Sold by Spencer Bros., Suffield. Sampled at factory.

ANALYSES OF CASTOR POMACE.

Station No.....	8940	8871	9330	9350	9332	9390	9360	8945
<i>Per cent. of</i>								
Nitrogen guaranteed	4.53	5.00	4.52	4.50	4.52	4.53	5.00	4.84
Nitrogen found...	4.65	3.45	4.61	4.75	4.71	4.66	5.06	4.91
Cost per ton.....	\$32.25	32.00	34.00	31.00	31.00	28.00	32.00	30.00

In sample **9350** one per cent. each of phosphoric acid and potash was guaranteed; the sample contained 1.46 per cent. of phosphoric acid but only 0.45 per cent. of water-soluble potash.

Sample **8871** was 1.55 per cent. deficient in nitrogen.

The average nitrogen content of the samples was 4.60 per cent. and the average cost per ton, \$31.28.

Assuming a value of 4 cents per pound for phosphoric acid and 25 cents per pound for potash, the average cost of nitrogen per pound in castor pomace this year was 27.3 cents, or \$5.46 per unit.

II. RAW MATERIALS CHIEFLY VALUABLE FOR PHOSPHORIC ACID.

BASIC LIME PHOSPHATE.

Shipments of basic phosphate from abroad have been almost cut off on account of the war. As a substitute for basic phosphate a product called "basic lime phosphate" has been put on the market, of which we have analyzed four samples of two brands. "Available phosphoric acid" was determined by the so-called Wagner method.

9367. Basic Lime Phosphate. Sold by American Agricultural Chemical Co., New York City. Stock of C. R. Main, Norwich.

9469. Same brand as **9367**. Stock of W. P. Chipman & Son, Talcottville.

9370. Basic Fruit and Legume Phosphate. Sold by Coe-Mortimer Co., New York City. Stock of Willis Smith, Winsted.

9434. Same brand as **9370**. Stock of A. T. Henry, Wallingford.

ANALYSES OF BASIC LIME PHOSPHATE.

Station No.	9367	9469	9370	9434
<i>Per cent. of</i>				
Total phosphoric acid.	14.29	14.10	14.02	15.65
"Available" phosphoric acid guaran- ty	13.00	12.00	13.00	13.00
"Available" phosphoric acid found ..	11.81	11.71	12.28	13.13
Cost per ton.	\$22.00	15.00

One sample of each brand contained less "available" phosphoric acid than was guaranteed.

PRECIPITATED BONE PHOSPHATE.

This is a manufacturing by-product and consists of fine precipitated phosphate of lime, neutral in reaction, and contains no nitrogen. It is very readily soluble in ammonium citrate solution and is quickly available to crops. It is at present chiefly used as a tobacco fertilizer.

Six samples were analyzed, all of which were sold by Olds and Whipple, Hartford. **9371** was sampled by the Station at the factory, and **9373** by the Station from the stock of F. T. Phelps, Suffield; **8711**, **8712** and **8742** were sampled and sent by the seller; **8872** was sampled and sent by Karl C. Kulle, Suffield. The respective car numbers for the last four samples were 88300, 73792, 4822 and 73365.

The guaranty for the material was 28 per cent. "available" and 32 per cent. total phosphoric acid.

ANALYSES OF PRECIPITATED BONE PHOSPHATE.

Station No.	9371	9373	8711	8712	8742	8872
<i>Per cent. of</i>						
Water-soluble phosphoric acid. .	1.56	1.33	1.41	1.37	1.01	1.50
Citrate-soluble phosphoric acid. .	29.98	27.98	28.67	28.44	30.65	29.10
Citrate-insoluble phosphoric acid	8.02	7.61	6.00	6.49	8.64	7.02
Total phosphoric acid.	39.56	36.92	36.08	36.30	40.30	37.62
"Available" phosphoric acid.	31.54	29.31	30.08	29.81	31.66	30.60

The above samples sold at the rate of \$1.40 to \$1.50 per unit of "available" phosphoric acid, or from 7.0 to 7.5 cents per pound.

PRECIPITATED PHOSPHATE.

9369. Sold by Berkshire Fertilizer Co., Bridgeport. Stock of W. N. Pinney, Rockville. Cost \$30.00 per ton. Guaranteed 22 per cent. "available" phosphoric acid. It contained

Water-soluble phosphoric acid.....	5.43
Citrate-soluble phosphoric acid.....	18.78
Citrate-insoluble phosphoric acid.....	0.95
Total phosphoric acid.....	25.16
"Available" phosphoric acid.....	24.21

"Available" phosphoric acid cost 6.2 cents per pound.

DISSOLVED ROCK PHOSPHATE OR ACID PHOSPHATE.

This material is made by treating mineral phosphates or phosphate rock with oil of vitriol (sulphuric acid), which converts the larger part of the phosphoric acid into forms soluble in water, and at the same time changes into sulphate of lime a large part of the lime which was previously combined with phosphoric acid.

The guaranty usually gives the percentage of "available" phosphoric acid. This is only a trade name for the sum of the water-soluble and citrate-soluble phosphoric acid. Its amount gives no certain indication of the actual availability of this phosphoric acid to crops. In acid phosphate, however, well made from domestic rock, it is fair to assume that the larger part of the "available" is also agriculturally available.

The following seventeen samples were analyzed:

9353. Sold by E. Manchester & Sons, Winsted. Stock of H. H. McKnight, Ellington.

9328. Sold by L. T. Frisbie Co., New Haven. Stock of H. G. Cooke, Branford.

9356. Sold by Virginia-Carolina Chemical Co., New York City. Stock of Tanner & Wilcox, Winsted.

8943. Sold by Nitrate Agencies Co., New York City. Stock of Edward White, Rockville.

9324. Sold by Armour Fertilizer Works, Chrome, N. J. Stock of Edward White, Rockville.

8816. Sold by L. T. Frisbie Co., New Haven. Sampled and sent by F. W. Browning, Norwich.

8938. Sold by American Agricultural Chemical Co., New York City. Stock of L. F. Burr, Branford.

9322. Sold by American Agricultural Chemical Co., New York City. Stock of J. A. Glasnapp, West Cheshire.

8946. Sold by Wilcox Fertilizer Co., Mystic. Sampled at factory.

8937. Sold by American Agricultural Chemical Co., New York City. Stock of L. F. Burr, Branford.

9327. Sold by Coe-Mortimer Co., New York City. Stock of J. E. Stoddard, Abington.

9351. Sold by L. T. Frisbie Co., New Haven. Sampled at factory.

9321. High Grade Soluble Phosphate. Sold by Coe-Mortimer Co., New York City. Stock of Joseph Humphreys, Danbury.

9326. Soluble Phosphate. Sold by Bowker Fertilizer Co., New York City. Stock of A. R. Manning, Yantic.

9355. Sold by F. S. Royster Guano Co., Baltimore, Md. Stock of W. Howard, Windsor.

8941. Sold by Apothecaries Hall Co., Waterbury. Sampled at factory.

8760. Plain Superphosphate. Sold by Sanderson Fertilizer & Chemical Co., New Haven. Sampled and sent by A. B. Smith, Clintonville. Suspected of containing added lime. 27.88 per cent. was present, not an abnormal amount.

ANALYSES OF ACID PHOSPHATE.

Station No.	Water-soluble phosphoric acid.	Citrate-soluble phosphoric acid.	Citrate-insoluble phosphoric acid.	Total phosphoric acid.	"Available" phosphoric acid found.	"Available" phosphoric acid guaranteed.	Cost per ton.	"Available" phosphoric acid costs cents per pound.

8941	12.44	2.10	0.50	15.04	14.54	14.0
8760	17.00

One of the above samples was guaranteed 18 per cent. "available"; ten were guaranteed 16 per cent., and five 14 per cent.

The average cost of "available" phosphoric acid in the above samples was 6.2 cents per pound, about 0.75 cents less than last year.

PHOSPHO PLASTER.

9368. Sold by American Agricultural Chemical Co., New York City. Stock of A. L. Burdick, Westbrook. Guaranteed 2 per cent. "available" phosphoric acid. It contained

Water-soluble phosphoric acid.....	2.03
Citrate-soluble phosphoric acid.....	2.63
Citrate-insoluble phosphoric acid.....	2.21
Total phosphoric acid.....	6.87
"Available" phosphoric acid.....	4.66
Lime (calcium oxid).....	31.93

BARIUM-PHOSPHATE.

9408. Sold by Witherbee, Sherman & Co., Port Henry, N. Y. Stock of Station Farm, Mt. Carmel. Guaranteed 14 per cent. phosphoric acid, 7 per cent. barium sulphid.

It contained 15.34 per cent. phosphoric acid, chiefly in insoluble forms.

III. RAW MATERIALS OF HIGH GRADE CONTAINING POTASH.

Owing to the war very little, if any, potash has been shipped to this country during the past three years. The three samples of muriate of potash analyzed represented stock in the hands of farmers who were tempted by the abnormally high prices to dispose of their surplus stock.

MURIATE OF POTASH.

8691, 8692. Stock of Samuel Wilson, Waterbury. They contained 53.92 and 52.44 per cent. of potash, respectively.

8801. Stock of W. T. Peters, Cheshire. It contained 58.24 per cent. of potash.

COTTON HULL ASHES.

9279. Sold by Olds and Whipple, Hartford. Car No. 22120; stock of Windsor Tobacco Growers Corporation, Windsor. Cost \$6.00 per unit of water-soluble potash, equivalent to 30 cents per pound for actual potash. It contained 24.78 per cent. of potash.

IV. RAW MATERIALS CHIEFLY VALUABLE FOR
NITROGEN AND PHOSPHORIC ACID.

FISH MANURES.

The twelve samples analyzed show considerable uniformity in the content of nitrogen, which ranges from 7.28 to 9.75 per cent., with an average of 8.34 per cent. The phosphoric acid, however, shows a wide range, from 2.75 to 10.41 per cent., with an average of 6.77 per cent. Six of the samples failed to meet their guaranties, two being deficient in nitrogen, one in phosphoric acid, and three in both of these elements. 9365 and 9100 contained only about half of the phosphoric acid guaranteed.

The average cost was \$53.44 per ton, about \$2 higher than last year. If the phosphoric acid were valued at 4 cents per pound, the nitrogen cost on the average 28.8 cents per pound; if at 6 cents per pound, the nitrogen cost 27.2 cents.

TANKAGE.

(Analyses on pages 386 and 387.)

This material, made from the waste of slaughter houses and meat markets, naturally shows considerable differences in composition, depending upon the relative amounts of meat and bone present.

The thirteen samples analyzed fall into two quite well-defined groups, the one containing from 4.26 to 5.67 per cent. of nitrogen and from 14.06 to 21.42 per cent. of phosphoric acid, the other containing from 7.16 to 8.34 per cent. of nitrogen and from 5.62 to 11.19 per cent. of phosphoric acid.

The samples of the first group, approximately 6-30 grade, cost from \$28 to \$42 per ton; the higher grade tankages, 9-20, cost from \$48 to \$55 per ton.

The average composition and cost of the two grades were as follows:

Grade.	Nitrogen.	Phosphoric Acid.	Cost per Ton.
6-30	4.78	17.39	\$35.33
9-20	7.83	7.96	51.00

Only four of these samples could be called fine, having 50 per cent. or more by weight in particles smaller than 1-50 inch.

Two samples failed to meet their nitrogen guaranty, one that for phosphoric acid, and one was deficient in both nitrogen and phosphoric acid.

BONE MANURES.

(Analyses on pages 388 and 389.)

The analyses of twenty-one samples of bone are given in the table. "Bone," like tankage, has a wide range of composition; some samples being from raw bone with or without much adhering meat and cartilage, others representing bone which has been cooked, the grease and nitrogenous matter being partially removed.

The average per cent. of nitrogen in these samples is 3.40 and of phosphoric acid 23.35. The average cost per ton, barring the exceptional prices of **9393** and **9387**, was \$40.60.

Two samples failed to meet their nitrogen and two their phosphoric acid guaranties.

V. MIXED FERTILIZERS.

NITROGENOUS SUPERPHOSPHATES.

REGARDING GUARANTIES.

The following tables, pages 394 to 415, present 375 analyses.

Of those sampled by the Station Agent 143 are guaranteed to contain potash. 172 contain no potash. Three brands were

TANKAGE.

guaranteed to contain four per cent. of potash, though only one had nearly that amount. Seven brands guaranteed 3 per cent., nineteen 2, and the rest 1 per cent. or less.

Of the brands containing potash about 23 per cent. failed to meet their guaranty in one ingredient, while of the 172 without potash 16.8 per cent. failed in the same way.

In a large number of cases, however, a shortage of one ingredient was made good by an overrun of another, so that the buyer received full value for his money, but in the following brands this was not the case. Reckoning nitrogen at 27 cents, available phosphoric acid at 6 and potash at 30 cents per pound, respectively, the deficiency in money value per ton was:

* Car lot.

QUALITY OF PLANT FOOD IN NITROGENOUS SUPERPHOSPHATES.

The potash given in the analyses is all water-soluble and available to crops.

The same is true of the "soluble" phosphoric acid. The "citrate-soluble" phosphoric acid, which with the water-soluble is called "available" by trade usage, is doubtless more promptly available to crops than the insoluble, although there are probably

BONE MANURES.

very considerable differences in the agricultural value of citrate-soluble phosphoric acid from different sources or materials. The same is true, also, of insoluble phosphoric acid. Thus, the insoluble phosphoric acid of bone is much more quickly available to crops than that from phosphate rock or apatite.

It is safest to give preference to those mixed fertilizers in which the proportion of insoluble phosphoric acid is small.

Regarding nitrogen, that which is in form of nitrates is the

BRANDS IN WHICH INFERIOR FORMS OF NITROGEN ARE INDICATED.

most quickly and completely available. As a rule the nitrogen of ammonia salts is less quickly and completely available than that of nitrates, but ranks next to it.

The organic nitrogen of fertilizers is supplied by a great variety of materials which differ very considerably in agricultural value.

The details of the methods used to detect very inferior forms of nitrogen have been given in previous reports.

By the alkaline permanganate method forms of organic nitrogen are considered inferior in which less than 50 per cent. of the water-insoluble, organic nitrogen is soluble in the reagent. By the neutral permanganate method, any solubility of less than 80 per cent. is suspicious. Some objection has been made to the method because dried horse and sheep manure, recognized as good fertilizers are ranked as inferior by these methods. It is true that both have agricultural value, but this depends to a considerable extent on the favorable action in the soil of the decomposing vegetable matter, while experiment has shown that the organic nitrogen in them is less available than in the forms ordinarily used in the compounding of fertilizers.

In the following brands inferior forms of nitrogen are indicated by both methods:

REGARDING PRICES OF NITROGENOUS SUPERPHOSPHATES.

The dealers' quotation of the cash ton price was obtained in most cases when each sample was drawn. These prices are, however, no real guide to prospective purchasers. The manufacturer has little or no control over the price which the retailer or agent will charge and the latter sells to the consumer according to special terms made with him, which are largely governed by time of payment and knowledge of the consumer's financial standing and habits. To take a concrete case: To-day a 2-10-0 formula can be bought for \$40. That is called the "cash ton price."

But if paid for before Feb. 1 its price will be \$37; if before Apr. 1, \$37.40; July 1, \$38.00 and on Dec. 1, \$40. If bought in car lots it will cost \$1.00 per ton less. If sold in small fractions of a ton the price will be considerably higher. Again, if several dealers in one place are competing for trade, the quoted prices are likely to be less than where there is no competition, or where the dealer knows that payments will be slow.

The general range of prices is shown in the following table:

AVERAGE HIGHEST AND LOWEST PRICES QUOTED TO THE STATION AGENT, 1917.

Formula.	Average Cash Ton Price.	Lowest.	Highest.
1- 7-1	\$29.00
1- 8-1	29.75	\$28.00	\$31.00
1-10-1	31.67	30.00	35.00
2- 8-1	33.50	30.00	34.00
2- 9-1	33.33	31.00	36.00
2-10-1	35.10	32.00	38.00
2- 8-3	42.50
2- 8-4	50.00
3- 6- $\frac{1}{2}$	37.50
3- 8- $\frac{1}{2}$	27.75	25.50	32.00
3- 8-1	36.00	34.00	39.00
3- 9-1	36.23	34.00	41.00
4- 6-2	33.50
4- 8-1	36.75	33.00	40.00
4- 8-4	54.00

12- 5-1	66.00

A rough "valuation" may be made by valuing nitrogen as

Nitrates at.....	26 cents
Ammonia at.....	29 "
Organic.....	25 "
Available phosphoric acid at.....	6 $\frac{1}{2}$ cents
Water-soluble potash.....	28 $\frac{1}{2}$ "

ANALYSES REQUIRING SPECIAL NOTICE.

8910. The American Ag'l. Chem. Co.'s Complete Manure for Top Dressing 1916 was found below guaranty in nitrogen. A second sample, **9345**, taken from a different source, was analyzed with approximately the same results.

8909. The above company's Sure Growth Phosphate being somewhat below guaranty in potash, a second sample, **9344**, of this brand from a different source was found to meet fully its guaranty.

A similar result appears in the two analyses of Bradley's Patent Superphosphate, 1916, Nos. **8977** and **9346**.

9213. Armour Fertilizer Co.'s Bidwell's 3-8-1, having considerably less nitrogen than was guaranteed, the manufacturer requested the analysis of another sample, but it was not possible at that time to find the brand on sale in the State.

9032. Coe-Mortimer Co.'s New Englander Special 1916, being found deficient in both nitrogen and potash, effort was made without success to find for analysis another sample.

9405. National Extra High Grade Potato Fertilizer showed deficiencies in all three ingredients and we were unable to get another sample from a different source for analysis.

9040. The Royster Guano Co.'s Dreadnaught Fertilizer, having been found deficient in potash, a second sample, **9282**, was drawn from a different source, which showed more potash, 1.86 per cent., the guaranty being 2 per cent.

9068. Quinnipiac Wrapper Leaf Brand Tobacco Manure, without Potash, not meeting its nitrogen guaranty, a second sample was analyzed, **9319**, which fully met the guaranty.

8997. Rogers H. G. Soluble Tobacco Manure failing to meet its guaranty of available phosphoric acid, a second sample, **9347**, drawn from a different source, was analyzed but agreed in composition with the first sample. It will be noticed that most of the superphosphates without potash made by this firm, while fully meeting their guaranties in all other respects, fail to meet them in the one particular of "available" phosphoric acid. The manufacturer states that the phosphatic material used is precipitated bone mixed with fine bone sawings; that the amount of available phosphoric acid found in these materials when separately analyzed should yield fully the amount guaranteed in the mixture of them; but that this is not the case and that there are large discrepancies between the analyses of mixtures of these two ingredients reported by different trade chemists. Examination of the bone used shows the presence of a considerable amount of carbonate of lime. The presence of carbonates, we believe, in any fertilizer is likely to reduce the amount of "available" phosphoric acid found by the official method. The precipitated bone, whether alone or mixed with carbonates, is, we believe, readily available to crops.

9225. Royster's Curfew Ammoniated Superphosphate having failed to meet its nitrogen guaranty, a second sample, **9348**, drawn from a different source, was analyzed and substantially met the nitrogen guaranty. The same thing was found in Royster's Good Will Ammoniated Superphosphate, Samples **9228** and **9404**.

8907. In Sanderson's H. G. Ammoniated Phosphate the available phosphoric acid was below guaranty but in two other samples of the same brand, **9075** and **9308**, this guaranty was fully met.

TABLE I—NITROGENOUS SUPERPHOSPHATES.

Station No.	Manufacturer and Brand.	Place of Sampling.	Dealer's cash price per ton.
<i>Sampled by Station:</i>			
International Agricultural Corp., Buffalo, N. Y. (Con.)			
9257	Buffalo High Grade Manure.....	Stafford Springs.....	\$33.00
9256	Buffalo Potash Special.....	West Cheshire.....	35.75
8984	Buffalo Potato and Corn.....	Waterbury.....	50.00
Kirke Chemical Co., Brooklyn, N. Y.			
8985	Kirke Fertilizer.....	Greenwich.....	\$
Lister's Agricultural Chemical Works, Newark, N. J.			
9300	Ammoniated Dissolved Superphosphate 1916.....	Branford.....	32.00
9262	Complete Tobacco Manure 1916.....	West Suffield.....	40.00
8986	Corn and Potato Fertilizer 1916.....	West Suffield.....	31.00
9263	Potato Manure 1916.....	Burnside.....	42.00
9260	Special Tobacco Fertilizer 1916.....	Brookfield.....	33.00
9261	Standard Pure Superphosphate of Lime 1916.....	Burnside.....	35.00
9259	Success Fertilizer 1916.....	East Canaan.....	29.00
Lowell Fertilizer Co., Boston, Mass.			
9264	Superior Fertilizer.....	Wethersfield.....	37.05
E. Manchester and Sons, Winsted, Conn.			
9265	1917 Special.....	Ellington.....	39.00
The Mapes Formula and Peruvian Guano Co., New York City.			
8987	Corn Manure 1916 Brand.....	Middletown.....	36.00
9033	General Special 1916 Brand.....	Windsor Locks.....	50.00
9034	Potato Manure 1916 Brand.....	Suffield.....	41.00
9403	Tobacco Manure 1916 Brand.....	Hartford.....	59.00
8914	Tobacco Starter Improved.....	Windsor Locks.....	42.00
9119	Top Dresser Half Strength 1916 Brand.....	Hartford.....	42.00
9118	Top Dresser Full Strength 1916 Brand.....	Hartford.....	66.00
National Fertilizer Co., New York City.			
8915	Complete Root and Grain Fertilizer 1916.....	Thompsonville.....	39.50
9121	Eureka Potato Fertilizer 1916.....	So. Manchester.....	38.25
9037	Extra H. G. Manure 1916.....	Warehouse Point.....	41.75
†9405	Extra H. G. Potato Fertilizer.....	West Cheshire.....	54.00
9036	Potato Phosphate 1916.....	Guilford.....
8916	Tobacco Special 1916.....	Warehouse Point.....	39.48
9035	Universal Phosphate 1916.....	Wallingford.....	30.00
9120	XXX Fish and Potash 1916.....	Wallingford.....	30.00
Olds and Whipple, Hartford, Conn.			
9038	Complete Corn, Potato and Onion Fertilizer.....	Silver Lane.....	33.50
9268	Complete Tobacco Fertilizer.....	Hartford.....	42.50

These dried manures are chiefly of interest to florists and to greenhouse or lawn owners. As we have said in previous reports, they are out of the question for general farm use, because horse manure supplies three or four times as much plant food for the same money, and the extra vegetable matter should be supplied in farm crops and residues.

WOOD ASHES.

Twenty samples called "wood ashes" were analyzed. Three of these, **8862**, **8811** and **8698**, have the character of lime-kiln ashes and contain very little potash. The remaining samples are good, bad or indifferent. Nine samples contained from 4.7 to 6.8 per cent. of potash; four from 2.8 to 3.7 per cent., and four from 0.8 to 1.7 per cent.

The prices were exceedingly variable; for instance, \$9.00 per ton for material containing 2.8 per cent. of potash; \$16.00 for ashes containing 1.5 per cent. and \$27.50 for one containing 4.72 per cent. Certain of the higher grades were sold on the unit basis, the price ranging from \$4.50 to \$6.00 per unit of water-soluble potash.

The extreme variability in the potash content of wood ashes emphasizes the necessity of always buying it on a definite guaranty of water-soluble potash.

Only three of the samples were accompanied by a guaranty, **9372**, **9025** and **8862**. These were guaranteed 2.00, 5.03 and 3.00 per cent. of potash, respectively, and contained 1.50, 4.72 and 0.07 per cent.

HOUSEHOLD WASTES.

At the present time, when the prices for potash fertilizers are almost prohibitive, any available source of this important element is a matter of interest. Possibly few householders realize the fertilizer value of many of their household wastes which they usually throw away. The actual content of potash in any of these is small, but may be worth saving.

The samples, whose analyses are given in the accompanying table, were for the most part prepared by Prof. P. E. Browning, of Yale University, and submitted by him to us for analysis. It is to be regretted that the actual percentages of ash were not determined, as the information thus supplied would have been valuable. The results, however, are suggestive, and indicate how much valuable fertilizer material in the aggregate is thrown away by the American public. Many of these ashes could be prepared in the ordinary open fireplace of the average home and could be collected with the ashes from the wood there burned. The citrus fruit skins, because of their oil, burn readily, and our analyses show how rich in potash their ashes are. The analyses also suggest the utility of community incinerating plants as a means of conserving the important amounts of potash which some household wastes contain.

Mineral matter.....	35.27	32.61	11.76	9.14	14.08	9.03	47.16
Organic matter.....	64.73	67.39	88.24	90.86	85.92	90.97	52.84
Nitrogen.....	2.19	1.73	2.48	3.00	2.39	1.90	1.35
Phosphoric acid.....	1.75	0.06	*	*	*	*	*
Potash.....	*	0.11	*	*	*	*	*

The two commercial samples contain much more mineral matter and, consequently, less vegetable matter than four of the samples from local deposits. It will be noted that **9062** contains less of all the ingredients claimed except mineral matter, containing only two-thirds of the nitrogen, one-twentieth of the phosphoric acid and one-fifth of the potash claimed.

* Not determined.

TOBACCO WASTES.

8410. Tobacco Stems. Sold by Olds and Whipple, Hartford. Sampled and sent by H. E. Wells, East Windsor Hill.

8851. Tobacco Stems. Sampled and sent by A. T. Henry, Wallingford.

8850. Tobacco Waste Ash. Sampled and sent by A. T. Henry, Wallingford.

8848. Tobacco Dust. Sampled and sent by J. Rosenberg & Co., Hartford.

8702. Tobacco Dust. Sampled and sent by Morgan & Dickinson, Windsor.

	8410	8851	8850	8848	8702
Nitrogen.....	1.97	2.80	2.78	1.64
Phosphoric acid.....	0.56	0.79	1.10	0.69	0.42
Potash, total.....	6.67	5.27	6.10	2.88	2.50

MISCELLANEOUS MATERIALS.

9339. Spent Hops. Sent by Arthur Mather, Hartford.

Water.....	79.50
Mineral matter.....	1.52
Organic matter.....	18.98
Nitrogen.....	0.81
Phosphoric acid.....	0.31
Potash.....	0.05

9141. Coffee Chaff. Sent by Morris West, Glastonbury. It contained nitrogen 1.92, phosphoric acid 0.15 and potash 1.63 per cent.

8959. Coffee Grounds. Waste from manufacture of G. Washington Coffee. Sent by manufacturer.

Nitrogen.....	0.81
Phosphoric acid.....	0.016
Potash.....	0.166
Water.....	60.50

8952. Ground Star Fish. Sent by F. L. Homan, New Haven.

Nitrogen.....	4.48
Phosphoric acid.....	0.42
Lime.....	24.32

8953. Musselizer ("Mussel Mud," "Nature's Own Fertilizer"). Sold by Agricultural Development Co., Lewiston, Me. Sent by F. P. Hubbard, Middletown.

8854. Marsh and Marine Mud. Sent by G. D. Tillinghast, Westerly.

	8853	8854
Nitrogen.....	0.82	0.28
Phosphoric acid.....	0.09
Potash.....	0.18	0.03

8832. Kelp. Sent by E. E. Burwell, New Haven. It contained nitrogen 1.83, phosphoric acid 0.64 and potash 2.64 per cent.

8749. Chimney Soot. Sent by Donahoe Bros., Middletown. It contained 0.31 per cent. of nitrogen.

8759. Ashes from factory sweepings. Sent by Waterbury Mfg. Co., Waterbury. It contained 0.08 per cent. of potash and 70.02 per cent. of material insoluble in acid. Copper was present.

9280. Lye used for cleaning type. Sent by W. C. Sharpe, Seymour. It contained 0.34 per cent. of potash, no nitrogen, traces of phosphoric acid and sulphates, and much carbonate. Its reaction was strongly alkaline.

8855. Sample apparently incorrectly tagged "Dry Ground Fish." Stock of George S. Phelps Co., Thompsonville. A mixed fertilizer of unknown brand. It contained 5.15 nitrogen, 8.18 "available" phosphoric acid, 9.54 total phosphoric acid and 0.86 per cent. potash.

SOILS.

Six samples of soils were tested for acidity. The details are of no general interest.

9713. Ground Sheep Manure. Sold by the Chicago Feed & Fertilizer Co., Chicago. Sampled and sent by the F. S. Platt Co., New Haven. Contained—nitrogen, 2.74; total phosphoric acid, 2.84; water-soluble potash, 2.07; guaranteed respectively 1.85, 1.50 and 1.25 per cent.
